

# SERIES 60 ZENER BASE

The Series 60 Zener Base is designed to be used in systems which incorporate voltage monitoring for head removal sensing and therefore require compatible bases.\*

If a detector is removed, the zener base clamps the supply line at 16–18V, depending on the load, maintaining the operation of manual call points in accordance with section 6.6.2 of BS5839, Part 1:1988.  
marked

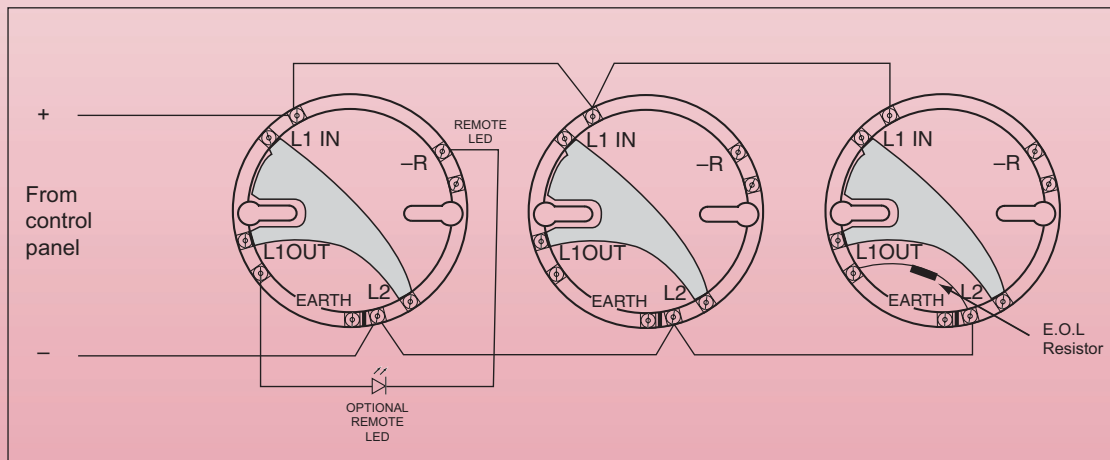

\*Patent no. GB 2069205, held by Protector Alarms Ltd, England

Part no 45681-350
